

“I can't stop telling everyone how wonderful the product is.”

the inner secret to outer beauty

specifically targets
skin, hair, nails and connective tissue

Q Why is the mineral silica so important?

Silica is important for healthy and strong connective tissue in the body, including the production of collagen in the skin. Silica also helps to maintain and support bone health.

Q What is Qsilica Colloidal Silica?

Qsilica Colloidal Silica contains microscopic particles of mineral silica. Colloidal silica may be utilised by the body to help strengthen and support the health of connective tissue, skin, hair, nails, bones and teeth.

Q What do our customers say about Qsilica Colloidal Silica?

“I started off with short, weak nails that were continuously chipping and breaking and now my nails are so strong that I just can't stop marvelling at them. Also, my hair is noticeably stronger-too. Last but not least, my skin is so much smoother and firmer! I shall continue using this product...”

Teresa Marshall, Auckland NZ

“Since taking Qsilica my hair is soft and lustrous...and my friends tell me that I have a healthy glow to my skin. This is truly a brilliant Australian product.”

Christina West, NSW Australia

“I just had to let you know how successful your Qsilica capsules have been for my nails... I am now into my 3rd box of Qsilica capsules and my nails are lovely and strong and I can't stop telling everyone how wonderful the product is.”

Anita Dyson, NSW Australia
