

IMMUNE system SUPPORT

For over 30 years Wassen Selenium-ACE has been used by thousands of people around the world and now this potent antioxidant formula is available in Australia!

The powerful antioxidant selenium is an essential trace mineral found in soil and enters the food chain through plants. Selenium intakes in Australia vary depending on environmental conditions and farming practices and unfortunately these levels can decline over time.

Each Wassen Selenium-ACE one a day tablet contains a high level of selenium enriched yeast plus vitamins A, C and E - all of which are powerful antioxidants, important for maintaining a healthy immune system. Selenium activity in the body may be further enhanced by the presence of vitamin E.

Antioxidants help to protect the body from oxidation by counteracting free radical damage.

Taking Wassen Selenium-ACE as part of a healthy lifestyle is a quick and convenient way to support your immune system.

Always read the label. Use only as directed.
