Qsilica® in Selfridges London

Leading Australian complementary health Company, Planet Health is thrilled to announce that Qsilica -their hugely successful and market leading skin, hair & nails product - is now available in the Lloyds Pharmacy in Selfridges on Oxford Street, London.

Selfridges is considered to be one of *The 100 Stores To Visit* in the world. Architecturally magnificent, it is the second largest store in the UK after Harrods (which is also one of Qsilica's prestigious stockists). Selfridges opened in 1909 and its windows are now synonymous with iconic brands and have become almost as famous as the Company and the Oxford Street location itself. They attract tourists, designers and fashionistas alike to marvel at up-to-the-minute designs, styling and fashion trends.

Planet Health is a leading Australian distributor of premium, natural health products. The Qsilica range for healthy skin, hair, nails and connective tissue is Planet Health's own brand.

Qsilica was also launched into Harrods London store in April of this year and has since been in the Top 10 Selling Products in their pharmacy every week. World leader in natural and organic foods, Whole Foods Market UK, now also stocks Qsilica in all their stores. Whole Foods Market seeks out only the finest natural products for customers to enjoy.
